**DISCOUNT J**

**Time Saving!**

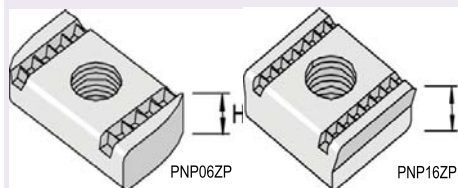

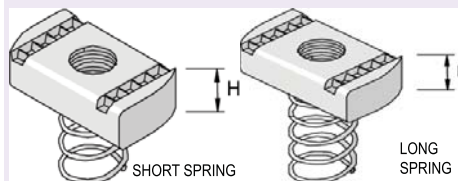

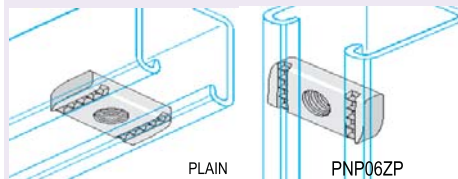

- makes trapeze pre-assembly an easy option
- trapeze installation can now be one man operation
- provides ability to height adjust with ease up to 30mm
- eliminates the need for strut grid
- can be used with either M8 or M10 studding
- 340kg SWL per 2 fixings
- can also be used as strut suspension/height adjusting bracket
- can be pre or post- fixed

## CHANNEL FITTINGS

**DISCOUNT B**

### Applications:

Channel fittings offer total flexibility in design and construction. A support system for mechanical or electrical services, they can be used for a variety of needs, typically for framework, for ceilings, floors and walls, or providing the structural elements to form complex walkways, racking, roof trusses and load bearing modular ceilings

### Materials:

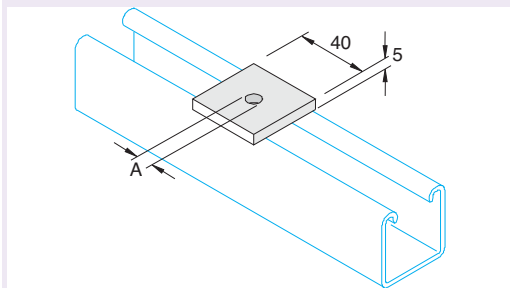

Manufactured to BS 6946

### Finish:

To BSENISO 1461:1999 unless otherwise stated. Other finishes available upon request.

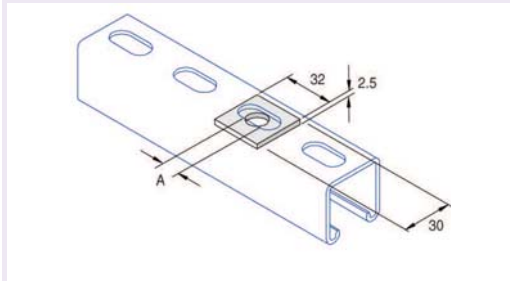

We pursue a policy of continuing improvement in design and performance of products. The right is therefore reserved to vary specifications without notice.

## CAST-IN CHANNEL

**DISCOUNT B**

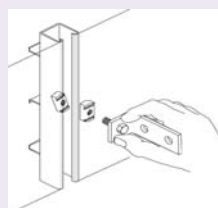

Cast-in channel is manufactured from standard Unistrut section and can be installed in floors, walls and ceilings, for the support of all types of piping, conduit, cable support and other industrial equipment.

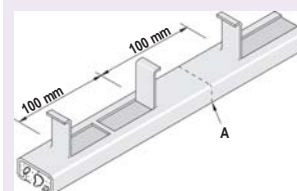

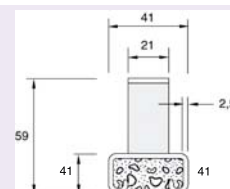

Cast-in channel is available pre-filled with an easily removable foam; this is to prevent the ingress of grout or cement.

Spring nuts can be inserted anywhere along the length of the channel, providing a means of attachment for all kinds of fittings or rods where required.

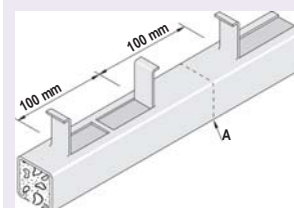

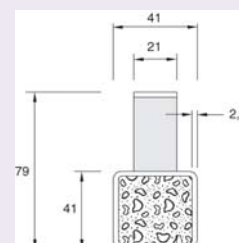

Supplied in pre-galvanised as standard, hot dip galvanised and stainless steel finishes are also available. Please contact the Sales Office on 01932 754700 for details

Designed to accommodate M6, M8, M10, and M12 fixings. Normal cutting positions are between lugs as indicated (A). Supplied in 6 metre lengths. Non-standard lengths can be supplied in increments of 200mm.

PRODUCT CODE	SIZE (mm)	UNISTRUT CODE
